

CURRICULUM VITAE

Kely Tamara Romero Romero

Agronomist · Agricultural Research & Data Analysis

Loja, Ecuador · +593 99 851 2944 · kely.romero@unl.edu.ec · LinkedIn: kely-tamara-romero

EDUCATION

2026 — **Agronomy Engineer** · Universidad Nacional de Loja, Faculty of Agricultural and Renewable Natural Resources

COURSES & CERTIFICATIONS

- **2026** — **Claude Code: Complete Guide for Software Developers** · Certificate of completion
- **2025 – 2026** — **Descriptive and Inferential Statistics** · Florida Global University and GEM
- **2025** — **Seeds, 2nd Mundoagro Course** · Mundoagro Capacita, 10 h
- **2024** — **Citrus: Management and Physiology** · Mundoagro Capacita
- **2024** — **Cherimoya crop management** · ConQuito

EXPERIENCE

Thesis Author
2024 – 2026

Universidad Nacional de Loja · Advisor: Ing. Johnny Granja Travez, Mg. Sc.

Application of statistical models to estimate yield and cup quality in coffee production systems in Loja province.

- Collected coffee and soil samples at producer farms across Loja province.
- Ran laboratory analyses (pH, titratable acidity, soluble solids, 100-bean weight) and prepared samples for sensory evaluation, funded by the UNL Research Directorate.
- Built multiple linear and polynomial regression models and *machine learning* models in Python and InfoStat, including exploratory analysis, correlation matrices and partial residual checks.
- Identified fertilization, planting density and altitude as the main drivers of yield, and fruit pH and soil electrical conductivity as key factors for cup quality.

Research Assistant
2025 · 6 months

Universidad Nacional de Loja · Project: *Evaluation of the initial growth of promising cacao clones for the Ecuadorian Amazon under different nitrogen nutrition sources*

- Provided research support throughout the project.
- Established the experimental trials.
- Analyzed the data generated by the trials.

Research Assistant
2022 · 6 months

Universidad Nacional de Loja · Project: *Morphological identification of native cherimoya populations with agronomic potential in Loja province*

- Analyzed laboratory samples for the morphological characterization of native cherimoya populations.
- Processed and analyzed the data generated by the project.

Pre-professional Intern · APEOSAE
Mar – Apr 2024

Federation of organic exporters of the southern Ecuadorian Amazon · Nangaritza, Zamora Chinchipe

- Nursery: transplanted Geisha coffee seedlings and performed side-veneer grafts on cocoa (30 seedlings in my care).
- Post-harvest: cocoa drying; sorting, roasting, grinding and packaging organic coffee.
- Completed the full 360-hour internship program (240 work hours and 120 community-service hours).

AWARDS

- **Academic Excellence Incentive**, Universidad Nacional de Loja (Oct 2024 – Mar 2025).
- **Scientific poster presenter**, III Formative Research Conference in Agronomy (Feb 2025).

LANGUAGES

Spanish	Native
English	B1 (CEFR) · UNL Language Institute, 768 h

SKILLS & SOFTWARE

Software	Python, R, InfoStat, Excel, Claude Code
Data analysis	Multiple regression, *machine learning*, exploratory analysis
Laboratory	pH, titratable acidity, soluble solids, soil sampling, cupping (sensory analysis), morphological characterization
Field	Nursery management, grafting, coffee and cocoa post-harvest, working with producers
